

Day 3 Step IV

Genesis Notes:

- God gathered the water into one place. Dry land appeared.
- God called the gathered water Seas and the dry land Earth.
- God created the grass, herb and fruit tree.

Observations:

- The dry land may have been like a continent surrounded by water or the water could have been surrounded by the dry land.
- Plant life was the first life created. The plant life had to be created first as a food, building material and housing supply prior to the creation of the animals and man. The plant life would also regenerate the oxygen.
